PROFESSIONAL SUMMARY

Software developer with a UI/UX design background and hands-on experience building user-facing web applications across frontend and backend layers. Brings a rare combination of development capability and design thinking, enabling close collaboration with designers, reducing rework, and delivering accessible, polished digital products. Strong foundation in JavaScript, React, .NET, with a track record of improving usability and onboarding across real-world projects.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, TypeScript, C#, SQL

Frameworks & Libraries: React, Next.js, .NET, ASP.NET Core, MVC, Razor Pages

Databases & Backend: SQL Server, Entity Framework Core, Firebase Authentication

CMS & Deployment: WordPress, Webflow, Vercel, GitHub Pages

Design & UI/UX: Figma, Adobe XD, Wireframing, Prototyping, Responsive Design, Tailwind CSS

Accessibility: WCAG 2.1/2.2 Level AA Awareness, Inclusive Design, Accessible Design Principles

Tools & Platforms: Git, Postman, Visual Studio, VS Code, SQL Server Management Studio, Jira

EXPERIENCE

Popp3r Cybersecurity — Nov 2025 – Dec 2025

Fullstack Software Developer (Co-op)

- Contributed to an early-stage full-stack prototype, collaborating on authentication logic, input validation, and application stability across multiple user flows.
- Enhanced user onboarding by implementing real-time validation and error handling in React/Next.js, reducing form submission errors and improving experience for both authenticated and guest users.
- Debugged and resolved 10+ front-end UI and navigation issues including modal overflow, dropdown behaviour, and marketplace state persistence.
- Assisted in implementing secure admin-only access controls using Firebase Authentication and server-side verification in Next.js, reducing unauthorised access risks.

Zebcha Infrastructure Limited — Jul 2023 – Nov 2024

UIUX Designer

- Designed and delivered 50+ high-fidelity web interface mockups used in pitch decks and funding presentations, improving clarity, accessibility, and stakeholder buy-in.
- Created user flows and interaction patterns that reduced frontend rework and streamlined developer handoff in an Agile environment.
- Analysed user behaviour and performance metrics to identify UX friction points, translating findings into actionable design improvements that informed frontend logic.

Rivala Technology Services — May 2022 – Jun 2023

UI/UX Designer

- Designed and iterated on user-centered web app interfaces in Figma, improving usability and increasing task completion efficiency by ~12% through clearer layouts and interaction flows.
- Supported end-to-end mobile and web app redesign, enhancing visual clarity and usability, contributing to a ~10–15% increase in user engagement across key screens.

- Built and enforced a shared design system with 20+ reusable components, reducing UI inconsistencies and cutting design revision cycles by ~15–18%.

PROJECTS

Smiths & Cole — Live Site

- Built a responsive business landing page in React, ensuring a consistent and polished experience across desktop, tablet, and mobile screen sizes.
- Managed the full deployment pipeline — purchasing a custom domain, configuring DNS settings, and deploying to production via Vercel.

Tools: *React, Vercel, Custom Domain, DNS Configuration, Responsive Design*

InstaClone — View Project

- Built an Instagram-inspired social media app with user registration, posts, stories, likes, comments, follows, and direct messaging. Implemented a multi-layer architecture using Razor Pages, services, and repositories, and tested with 100+ sample posts to ensure smooth CRUD operations.

Tools: *.NET 8, Razor Pages, MVC, Entity Framework Core, SQL Server, Dependency Injection*

Hirely — View Project

- Built a LinkedIn-inspired platform with secure login, dynamic user posts, and API-generated profiles. Implemented client-side and server-side features for profile management and user interactions, improving usability and session reliability.

Tools: *HTML, CSS, JavaScript, Figma*

Kawa – Mental Wellness App — View Project

- Designed a personal mental health companion with journaling, self-reflection prompts, and guided support features. Applied accessibility design principles including colour contrast, readable typography, and empathetic interaction patterns.

Tools: *Figma, Wireframing, Prototyping, Accessible Design, UX Research*

VOLUNTEER EXPERIENCE

Manitoba Innovates with Floodline Consulting Aug 2025

- Conducted UX research and prototyping to customise Auth0 login pages, improving usability, accessibility, and visual consistency for authentication flows.
- Collaborated in daily Agile stand-ups to troubleshoot challenges, prioritise tasks, and ensure timely delivery of design and implementation goals.

Harvest Manitoba Apr 2025 – Present

- Sorting and packing food items for Harvest Hampers, Meals2Go, and school/daycare programs, ensuring timely distribution to over 380 organisations across Manitoba.

EDUCATION

Manitoba Institute of Trades & Technology (MITT) Jan 2025 – Dec 2025

Diploma in Software Development — Winnipeg, MB

Landmark University Aug 2016 – Nov 2020

Bachelor of Science in Computer Science
